About Company

Who We Are

Established in 2018, Multi Dimensions Contracting Company (MDCC) is a leading contractor specializing in infrastructure and construction projects across the Kingdom of Saudi Arabia. We focus on delivering critical infrastructure solutions that support national development and enhance the quality of life for communities.

Our core services include:

- Real estate development
- Construction of large-scale building projects
- Telecommunication networks
- Water supply and distribution systems
- Electrical and power infrastructure
- Civil construction works
- Pumping and lifting stations
- Wastewater treatment plants

Driven by a strong commitment to quality, safety, and innovation, MDCC partners with government entities, utilities, and private sector clients to deliver projects that meet international standards and comply with local regulations. Our multidisciplinary team ensures efficient execution — from initial concept through to successful completion.

Aligned with the goals of Saudi Vision 2030, MDCC is dedicated to being a key enabler of sustainable infrastructure and urban growth, contributing to the Kingdom's long-term economic and social development.

Goals& Objectives

01 Deliver High-Quality Projects

Consistently execute construction and infrastructure projects that meet or exceed international quality standards.

02 Ensure Safety and Compliance

Uphold the highest standards of safety for workers, clients, and communities, while maintaining full compliance with local and international regulations.

03 Support National Development Plans

Align operations with national visions such as Saudi Vision 2030 by contributing to sustainable urban development and infrastructure growth.

04 Achieve Sustainable Growth

Expand business operations sustainably across sectors and regions while maintaining financial stability and operational efficiency.

05 Enhance Client Satisfaction

Build long-term relationships through transparency, on-time delivery, cost-effective solutions, and consistent client engagement.

Operational Objective

01 Complete Projects on Time and Within Budget

Implement efficient project management systems to minimize delays and control costs.

02 Leverage Advanced Technologies

Integrate modern construction techniques, digital tools, and innovative materials to improve project outcomes and productivity.

03 Develop a Skilled Workforce

Attract, train, and retain top talent across engineering, project management, and technical disciplines.

04 Promote Environmental Responsibility

Reduce environmental impact through eco-friendly construction practices, waste reduction, and energy-efficient solutions.

05 Strengthen Partnerships

Collaborate with government bodies, suppliers, consultants, and international partners to expand service capabilities and market reach.

Timeframe

01

Pre-Construction Phase

- Feasibility studies
- Land and site surveys
- Conceptual design and approvals
- Permitting and regulatory compliance
- Budgeting and contract finalization

02

Design and Planning Phase

- Architectural and engineering designs
- Structural and MEP drawings
- Final design approval from client and authorities
- Procurement planning and scheduling

03

Procurement Phase

- Tendering and subcontractor selection
- Materials sourcing and supplier contracts
- Equipment rentals and logistics setup

04

Construction Phase

- Site preparation and excavation
- Foundation and structural works
- Mechanical, Electrical, and Plumbing (MEP) installations
- Interior and exterior finishing
- Landscaping and infrastructure integration

05

Testing, Commissioning & Handover

- Quality inspections
- Safety checks and commissioning
- Client walkthroughs and approvals
- Official handover with documentation
